AHMAD ELDEEB

Lead Product Designer | AI Product Builder · Design Systems · Design Leadership

Egypt (Open to Remote, Relocation & International Roles) | ahmeddeeb28@gmail.com
Portfolio: deeb.design | LinkedIn: linkedin.com/in/el-deeb-39032b131

PROFESSIONAL SUMMARY

I'm a Lead Product Designer who builds and leads design teams that ship measurable results. At Sary, I managed 8 designers across 3 product squads, raised design velocity by 40%, and set quarterly design OKRs with the VP of Product tied to revenue and retention. Today, I lead a multidisciplinary design team across three game titles at Lobah.

I turn strategy into measurable outcomes: shaping product direction with founders and executives, then tracking it through activation, engagement, and conversion, from 22% more weekly active users to 35% higher notification open rates. I bring hands-on AI product experience, having shaped an AI pricing intelligence platform from 0 to 1, and use AI tools to prototype and validate ideas faster.

CORE COMPETENCIES

Design Leadership: People Management, Coaching & Mentoring, Design Reviews, Design OKRs, Cross-functional Alignment, Stakeholder Management

Product & UX: Product Design, UX Strategy, End-to-End UX, Information Architecture, Interaction Design, User Flows, Wireframing, Prototyping, Onboarding, Dashboards

Systems & Research: Design Systems, Design Tokens, Component Libraries, Design Governance, User Research, Usability Testing, Product Analytics, Dev Handoff

Domains: AI SaaS, Fintech, Gaming, B2B Marketplace, E-commerce, Logistics, PropTech, Wellness, Arabic/RTL & Bilingual Products

PROFESSIONAL EXPERIENCE

Lead Game Product Designer — **Jan 2025 – Present**
Lobah Gaming — *Poland (Remote)*

- Lead and mentor a multidisciplinary design team, setting clear ownership, performance expectations, and structured feedback loops to raise design quality and delivery.
- Own design strategy and direction across three titles (Samla, IceBreaker, Jackaroo), balancing player experience, business goals, technical feasibility, and production priorities.
- Redesigned onboarding and progression, cutting time-to-play by 40% and reducing early-session player friction.
- Built a scalable design system and workflows across PC and mobile, improving visual consistency, cross-team collaboration, and implementation readiness.
- Partner with product managers, engineering leads, and senior stakeholders to turn complex gameplay requirements into clear design priorities and unblock production.
- Run UX reviews, usability assessments, and design QA across milestones, prioritizing onboarding, core gameplay interfaces, and accessibility.

Product Design Consultant (Contract) — **Nov 2024 – Dec 2025**
Sampo AI — *Finland (Remote)*

Early-stage AI pricing intelligence platform helping sellers analyze market prices, price with confidence, and spot commercial opportunities.

- Partnered with founders, engineering, and growth to turn business goals and user needs into product strategy, information architecture, and launch-ready experiences.
- Owned end-to-end design for pricing analysis, dashboards, onboarding, and customer segmentation, turning complex pricing data into clear, actionable workflows.
- Designed pricing dashboards that increased usage by 40% in pilot testing, and streamlined onboarding to cut setup friction by 22%.
- Designed and validated acquisition journeys that lifted early sign-up intent by 28%, plus partner-facing experiences that drove 34% higher engagement.

Product Design Lead — **Oct 2023 – Dec 2024**
Hakbah (Fintech) — *Riyadh, Saudi Arabia*

- Mentored designers and streamlined feedback loops, improving design velocity by 20%; set consistent design standards across app, web, and notifications.

- Redesigned core savings flows, increasing weekly active users by 22%; introduced a visual savings tracker that drove 22% week-over-week engagement growth.
- Re-architected notification segmentation, raising open rates by 35% and feature adoption by 27%; co-authored partnership requirements that lifted lead generation by 15%.

Product Design Lead **Jan 2023 – Sep 2023**
Sary (B2B Marketplace) *Riyadh, Saudi Arabia*

B2B commerce platform connecting businesses with suppliers, simplifying procurement, ordering, and logistics across Saudi Arabia.

Promoted from Senior Product Designer (Sep 2021 – Dec 2022)

- Managed and mentored 8 designers across 3 product squads, setting up workflows, coaching, and delivery standards that improved design velocity by 40%.
- Partnered with the VP of Product to set quarterly design OKRs tied to revenue and retention, turning business goals into clear design initiatives.
- Led a tokenized design system adopted by 25+ engineers, cutting design-to-development handoff time by 30% and improving consistency across products.
- Directed research-driven improvements to pricing, catalog, and marketplace experiences, aligning design, product, and engineering to support growth in Saudi Arabia and Egypt.

Senior Product Designer, Sary *Sep 2021 – Dec 2022*

- Redesigned driver delivery workflows, improving order-closure accuracy by 36% and cutting delivery failures by 20% through research and new logistics KPIs.
- Redesigned B2B purchasing journeys, increasing order conversion by 6%, and introduced reusable components that reduced development churn by 40%.

Senior Product Designer **Jul 2020 – Aug 2021**
Zyda (Restaurant E-commerce) *Kuwait*

- Led design across 10+ web and mobile product launches, including restaurant storefronts, online ordering, dine-in, and subscriptions.
- Optimized customer journeys, improving visitor-to-sign-up conversion by 22%, successful orders by 15%, and repeat-order frequency by 28%.

Senior Product Designer **Mar 2020 – Jun 2020**
Nafas (Wellness) *Riyadh, Saudi Arabia*

- Helped shape the 0-to-1 core experience of a meditation and wellness platform, from initial concept through development and its later acquisition.

Senior Product Designer **May 2019 – Feb 2020**
Aqarmap (PropTech) *Egypt / Saudi Arabia*

- Improved property-search relevance from 54% to 80% through search experience optimization and data-informed design decisions.
- Redesigned onboarding and notification journeys, increasing new-user activation by 28%.
